Discover Petra

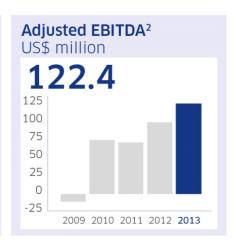

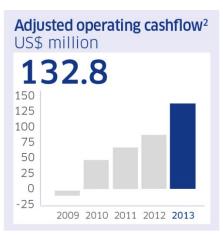

LSE: PDL: Constituent of FTSE 250; market capitalisation of ca. £850m / US\$1.4bn (as at 30 April 2014)

- 1. Pure play diamond exposure: uniquely poised to benefit from late cycle credentials and growing middle classes
- 2. Quality management and assets: consistent strategy, performance and track record
- 3. Strong growth profile: on track for 5m carats pa / ca. US\$1bn¹ revenue by FY 2019 all brownfields expansion
- 4. Significant margin expansion: operating margin of +30% rising to +50% by FY 2019
- 5. Fully financed: undrawn debt facilities and sufficient operating cashflow to cover capex; dividend from FY 2016

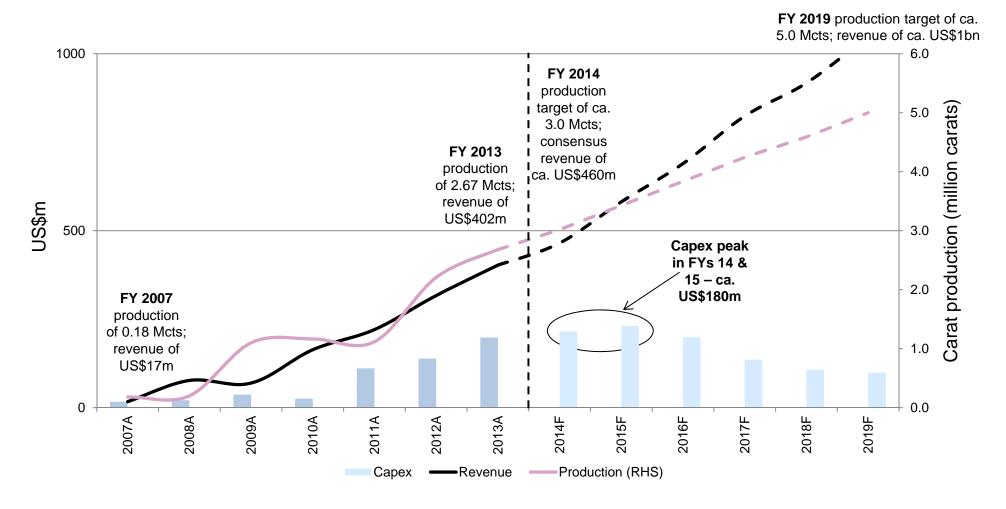

Organic Growth Path to 5 Million Carats pa

FY 2014 onwards – operating cashflow to cover capital programme

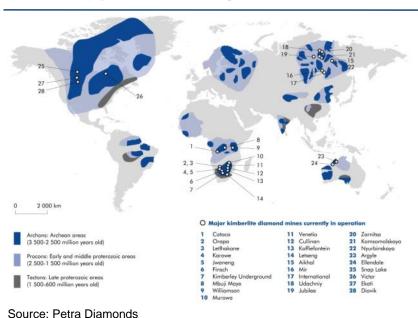

Note: All forecasts for Capex, revenue and production are management estimates. Capex is in nominal terms; diamond prices are calculated using a 4% real price increase.

1. Pure Play Diamond Exposure

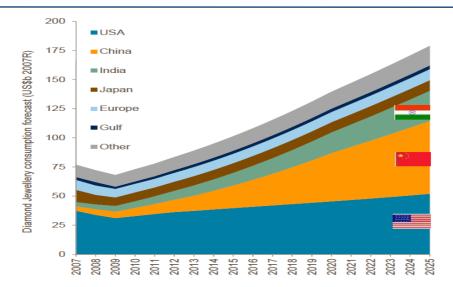

- Limited supply: only ~30 significant kimberlite mines in production; no major discoveries since 1990's
- Major mines maturing: past production peak; smaller footprints and some moving underground
- Late cycle credentials: demand driven by urbanisation, growing middle classes and continued recovery in US
- Exciting demand growth: consumption per capita in emerging regions still way below that of mature markets
- Mass luxury: China/India markets starting to follow US model of affordable diamond jewellery (\$200 to +\$2,000)

Limited Supply – less than 30 significant kimberlite mines

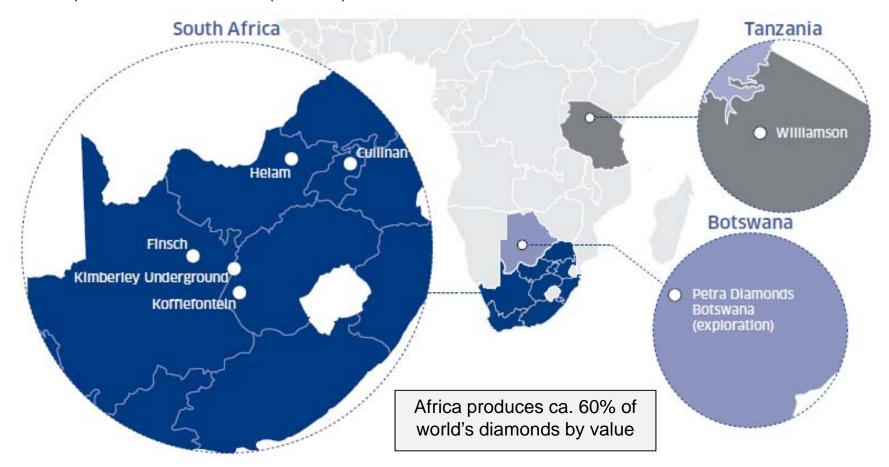

Growing Demand – China to surpass US marketshare by 2025

Source: Rio Tinto

- Diversified portfolio: five producing mines in South Africa, one in Tanzania and exploration in Botswana
- World-class resource: +300 million carats (largest outside the majors) worth ~US\$55.0 billion¹ (at 30 June 2013), incl. one Tier 1 asset (Cullinan)

- Petra team is highly experienced in managing producing diamond mines in Africa
- Consistent delivery of growth target of 5 Mctpa established in January 2011

	Mine Management		Project Development
•	Focus on efficiencies and simplification of management structures	•	Utilise in-house expertise/knowledge in design and execution of capital programmes
•	Disciplined cost control; share services across mines; efficient central overhead	•	Phased approach to achieve low capital intensity
•	Focus on 'value' as opposed to 'volume' production	•	Make decisions, get started

- Kimberlite production profile (diamond quality and size ranges) remains highly constant over time, resulting in accuracy for diamond price forecasting
- Ever growing volumes across the full diamond spectrum (from lowest to highest value)
- Growing trend for *mass luxury* supported by strong pricing performance in smaller / 2nd to 3rd quality goods

Historic, high value diamonds are a regular feature of Petra's production portfolio

Un-named Blue 29.6ct rough Sold for US\$25.6m *Cullinan, 2014*

3. Strong Growth Profile

- Caving is a safe and proven mechanised mining method
- Expansion programmes to establish new block/sub level caves in undiluted kimberlite
- Grades expected to rise significantly, increasing diamond content per tonne mined:
 - Finsch ca. 37 cpht to ca. 56 cpht¹
 - Cullinan ca. 30 cpht to ca. 50 cpht1
- Will reduce wear and tear on processing systems (waste rock is harder and more abrasive than kimberlite)
- Capital intensive to develop but low operating cost over long mine life
 - 1. Management expectations

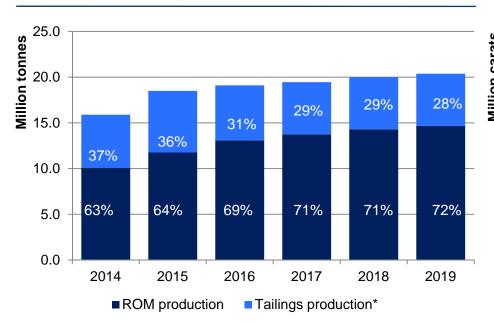

4. Significant Margin Expansion

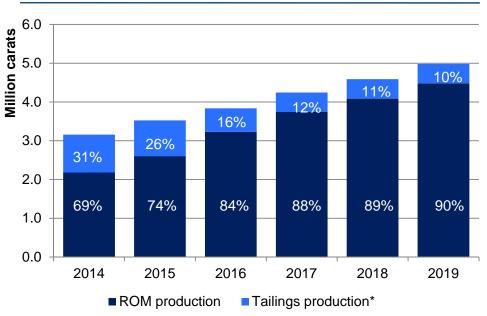

Operating margins to gradually rise from +30% to +50% by FY 2019

- ROM grades expected to increase ca. 50% once expansion programmes open up undiluted ore blocks
- Higher value ROM carats in production mix expected to increase to ca. 90%
- Unit costs to be well managed due to simplified orehandling systems and other efficiencies

Split of ROM (primary production) vs Tailings (re-processing old dumps) – tonnes processed

Split of ROM (primary production) vs Tailings (re-processing old dumps) – carats produced

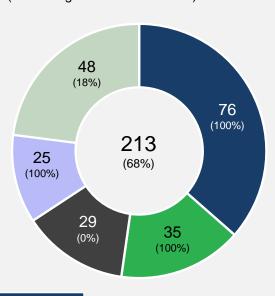

^{*} Includes Ebenhaezer tonnes from Koffiefontein and alluvials from Williamson

5. Fully Financed

IFC: Revolving credit

ABSA and FNB: Working capital and foreign exchange settlement facilities

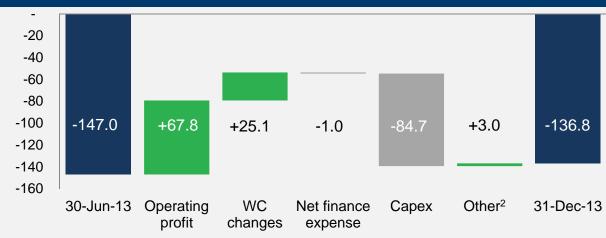

H1 FY 2014: operating cashflow covered capex

- Operating cashflow of US\$91.9 million
- Cash capex of US\$84.7 million

As at 31 December 2013:

- Cash: US\$28.0 million and diamond inventories of ca. US\$49.4 million
- Bank loans and borrowings: US\$136.8 million
- Net debt of US\$108.8 million
- Foreign exchange settlement liabilities: US\$8.8 million
- Facilities undrawn and available: US\$67.5 million

Loans and Borrowings Movement (US\$ million)

- 1. Utilising an exchange rate of US\$1:R10.445
- 2. 'Other' includes effect of exchange rate fluctuations on loans and borrowings and proceeds from issuance of share capital

Outlook

Rising Production

Rising Margins

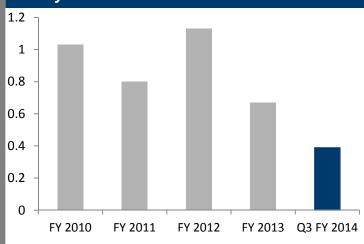

Rising Prices?

- Organic growth profile to ca.
 5 million carats
- Expansion on track and on budget
- Group margins expected to go from +30% to +50% (FY 2019)
- Management of unit costs higher tonnages and delivery of efficiencies
- Petra rough diamond prices up ca. 10% Jan to Apr 2014; firmer market conditions expected to end FY 2014
- Constrained supply
- Growing demand with 'mass luxury' driver

Integrated Approach to Sustainability

Safety

1. As at 25 April 2014

The Petra Board

Adonis Pouroulis (43) Non-Executive Chairman

Successful mining entrepreneur Founded Petra Diamonds in 1997 and floated first diamond company on AIM Along with fellow directors, built Petra into pan-African diamond group with over 5,000 employees (as at 30 June 2013)

Instrumental in raising funds to help finance and structure early stage mining companies in Africa

Johan Dippenaar (56) CEO

One of South Africa's most successful diamond entrepreneurs with +20 years' experience

Founded diamond group in 1990 and grew portfolio to three producing mines before listing as Crown Diamonds on ASX

Merger with Petra in 2005 – now at helm of London's largest diamond company

David Abery (51) Finance Director

Extensive experience as Chief Financial Officer in South African and UK business environments

In-depth knowledge of London capital markets

Integral to structuring and deliverance of strategic group corporate development, including acquisitions and joint ventures

Jim Davidson (68) Technical Director

Acknowledged world authority on kimberlite geology and exploration +20 years' experience in diamond mine management

Formerly Head of Diamond Exploration for Rio Tinto across Southern Africa As Technical Director of Crown Diamonds, managed specialist underground fissure mines over a decade

Tony Lowrie (71) Senior Independent Non-Executive Director

Over 35 years' association with the equities business and an experienced NED

Formerly Chairman of ABN AMRO Asia Securities & MD of ABN AMRO Bank. Has previously been a NED of Allied Gold Plc (prior to its merger with St Barbara Limited), Dragon Oil plc, J. D. Wetherspoon plc and several quoted Asian closed end funds

Currently NED of Kenmare Resources plc and a Director of the Edinburgh Dragon Fund

Dr Patrick Bartlett (68) Independent Non-Executive Director

Acknowledged expert on kimberlite geology and design and geotechnical aspects of block caving

Formerly Chief Geologist for De Beers; responsible for all kimberlite mines in South Africa

In-depth knowledge of several Petra mines, having worked at Finsch, Koffiefontein, Kimberley Underground, plus was geologist at Cullinan between 1983 to 2003

Since retiring has been involved in block caving projects for BHP, Anglo and Rio Tinto

Gordon Hamilton (68) Independent Non-Executive Director

Extensive experience as a NED across wide range of businesses, both JSE and LSE listed; chairs Audit Committee for all these companies

Formerly a partner for +30 years at Deloitte & Touche LLP; primarily responsible for multinational and FTSE 100 listed company audits, mainly in mining, oil & gas, and aerospace and defence; headed up Deloitte South Africa desk in London

Served for 9 years as member of the UK Financial Reporting Review Panel

Petra's Growth Path

- Petra has acquired five non-core diamond mines from De Beers (four in South Africa, one in Tanzania)
- Group resource base of 309.6 million carats² worth ~US\$55.0 billion³ (at 30 June 2013)

Production and Revenue – FY 2013 vs FY 2019

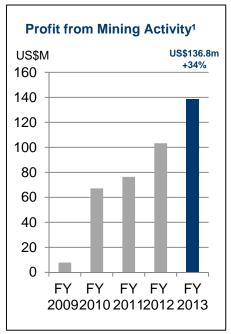

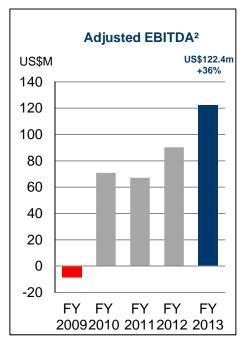

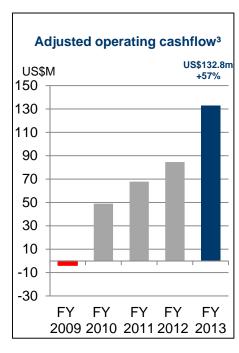

FY 2013 – Key Performance Indicators

- 1. 'Profit from Mining Activity' is stated before retrenchment costs, depreciation and share-based expense.
- 2. 'Adjusted EBITDA' excludes share-based expense, net unrealised foreign exchange losses, retrenchment costs, non-recurring transaction costs and impairment charges.
- 3. 'Adjusted operating cashflow' is IFRS operating cashflow adjusted for the movement in FY 2013 versus FY 2012 diamond debtors of ca. US\$50 million. This was due to a large tender that closed shortly before the FY 2013 year end, resulting in higher than normal diamond debtors as at 30 June 2013. Diamond debtors were settled shortly after year end.

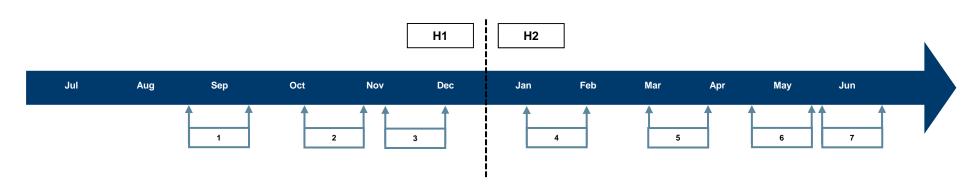

Q3 FY 2014

Production and Sales Summary

	Unit	Nine months to 31 March 2014	Nine months to 31 March 2013	Variance
<u>Production</u>				
ROM diamonds	Carats	1,623,304	1,466,769	+11%
Tailings and alluvial diamonds	Carats	755,836	427,998	+77%
Total diamonds	Carats	2,379,140	1,894,767	+26%
<u>Sales</u>				
Diamonds sold	Carats	2,323,475	1,734,855	+34%
Gross revenue	US\$M	349.4	262.0	+33%

Petra tender sales cycle – sales weighted to H2

Summary of Financial Results

	H1 FY 2014 (US\$m)	FY 2013 (US\$m)	FY 2012 (US\$m)

¹ Other than the percentage interests above, Petra has an interest in Sedibeng Mining, one of its BEE partners – refer document 'Effective Interest in Mines': <a href="http://www.petradiamonds.com/investors/analysts/ana

Falling Supply

- Production fell 28% from 2005 (177 Mcts; Zimbabwe 0.2 Mcts) to 2012 (128 Mcts; Zimbabwe: 12.1 Mcts)
- Success rate for finding an economic diamondiferous kimberlite is estimated to be <1% (De Beers)
- No Tier 1 discoveries for 20 years, despite US\$ billions spent on exploration in 1990s
- Long lead times from discovery to production (7 14 years) and development can be costly

Global diamond supply: historical and forecast production

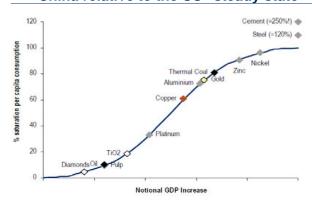

Source: RBC Capital Markets

Growing Demand

- Demand growth driven by urbanisation and growing middle classes in emerging markets, as well as continued economic recovery in major US market
- Additional 1.3bn people to attain middle income status by 2030;
 2.6bn by 2050 (HSBC 'Consumer in 2050' report)
- China starting to follow US trend mass market with emphasis on lower quality goods
- 'Mass luxury' affordable diamond jewellery (\$200 to +\$2,000) to drive market

Per capita consumption of key commodities: China relative to the US "steady state"

Current Rough Diamond Market

- Rough diamond market had strong start to calendar 2014 prices achieved by Petra up ca. 10%
- Firm market conditions in H2 further to solid seasonal sales, indicators of increasing global economic confidence, restocking of inventories and cautious optimism from Petra client base
- YTD FY 2014 prices in line with or above guidance

RBC Capital Markets Rough Diamond Index (June 2006 = 100)

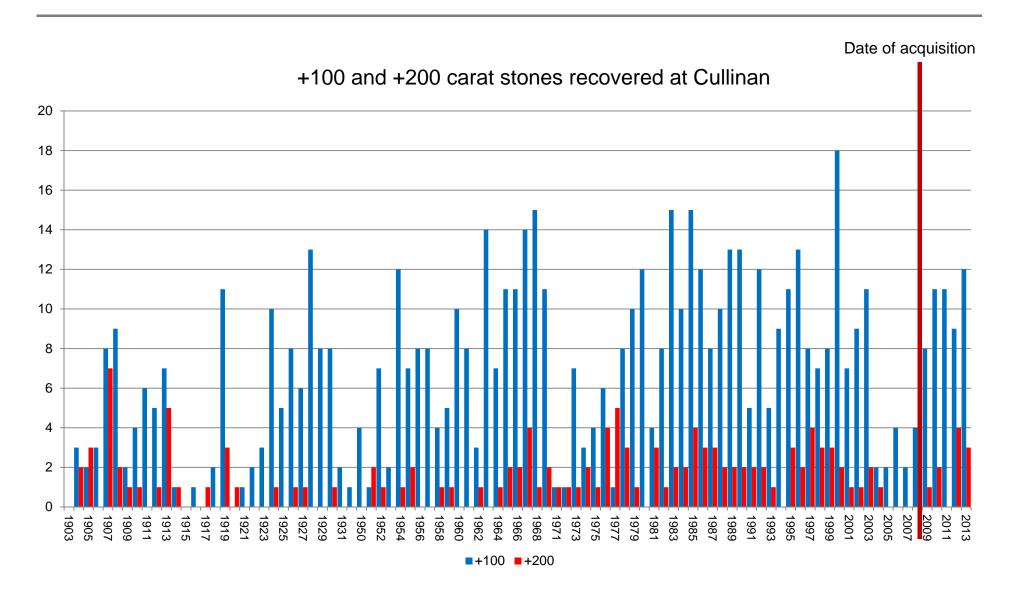

Petra – Rough Diamond Prices (US\$/ct)

Mine	Average ¹ (US\$/ct) Nine months to 31 March 2014	Management guidance (US\$/ct) FY 2014
Finsch	99	100 ²
Cullinan	193 ³	139
Koffiefontein	522	518
Kimberley Underground	313	301
Helam	153	145
Williamson ⁴	283	254

- 1. Unless stated, average values include all sales; i.e. ROM, tailings, other (e.g. Ebenhaezar satellite pipe) and special stones
- 2. Guidance for Finsch adjusted from US\$113/ct to US\$100/ct due to plant cut-off changes
- 3. Excluding 'exceptional' diamond sales (i.e. the two stones which sold for +US\$5m each), average value was US\$143
- 4. Williamson ROM sales only

Consistent Production of Specials

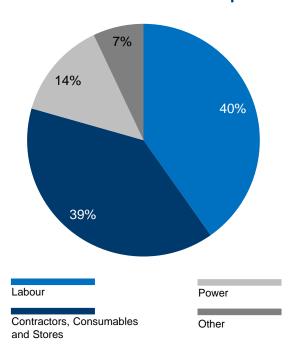

H1 FY 2014 Operating Costs

- On-mine cash costs decreased by 8% in US\$ terms:
 - SA operations costs increased in ZAR terms by ca.
 11%, mainly due to increased production and inflationary pressures
 - Offset by weakening ZAR vs USD (R10.07 average for H1 FY 2014 vs R8.46 for H1 FY 2013)
- Petra's cost focus and higher tonnage throughput helped mitigate inflationary cost pressures

On-mine cash cost make-up

Cost per tonne treated performance at Finsch/Cullinan (ZAR)

	H1 FY 2014	FY 2013	FY 2012
Finsch	143	139	134
Cullinan	147	158	177

Finsch – Development Programme

Expansion Plan – to take production to c.1.8 Mctpa by FY 2016 and c.2.0 Mctpa from FY 2017

- Mining currently taking place in Block 4 at 630m – FY 2014
- Development of SLC over 4 levels from 710m to 780m – FY 2014
- Dedicated conveyor orehandling infrastructure (to transfer SLC ore to existing infrastructure at 650m) – from FY 2016
- Decommissioning of Block 4 automated ore-handling system
 FY 2017
- First production from Block 5
 SLC FY 2015, ramping up to
 3.2 Mtpa FY 2017
- Pre 79 Tailings treated to FY 2016, then Post 79 Tailings treated to FY 2020
- Steady state production of 3.5
 Mtpa from Block 5 Cave at 900m – FY 2021

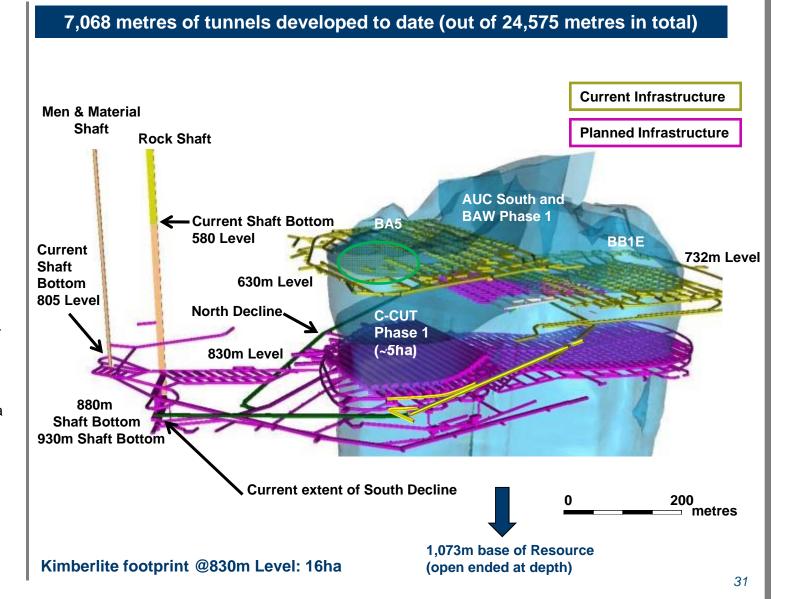

Cullinan – Development Programme

Expansion Plan – to take production to c. 2.2 Mctpa by FY 2019 (2.0 Mctpa ROM & 0.2 Mctpa tailings)

- Commenced rehabilitation of BA5 areas at 645m to create access to undiluted ore – FY 2013
- Development of declines, access tunnels and shaft deepening on track – FY 2013
- Tailings ramp up to steady state 2.7 Mtpa – FY 2015
- New production levels to be established at 839m and shaft to 930m to be commissioned – end FY 2016
- 880m ore-handling system, allowing for future ramp-ups to utilise full C-Cut footprint (16ha vs current 5ha) – end FY 2016
- Initial production from new C-Cut cave – FY 2016
- Upgrading and streamlining of plant facilities in order to handle increased tonnes – from FY 2015 to FY 2019

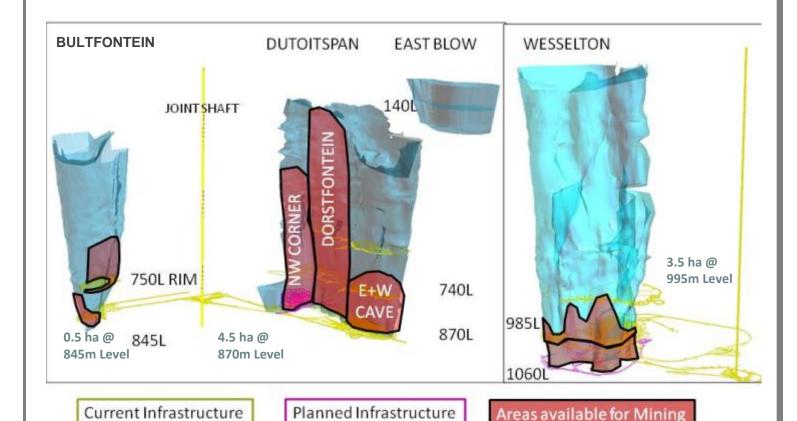

Kimberley Underground – Development Programme

Expansion Plan – to maintain annual production of c. 130,000 ctpa

- Construction and commissioning of plants at both Joint Shaft and Wesselton Shaft – completed in FY 2013
- Substantial stockpile of ore built up at each plant (~0.5 Mt combined)
- Planned ROM tonnes of 800 Kt (FY 2014) and 900 Kt (FY 2015); plant throughput of 1.1 Mt (FY 2014/15) due to stockpile
- ROM tonnes of +1 Mtpa
 by FY 2016
- Sampling programme to extend mine life – underway

Kimberley Underground Kimberlite Pipes Schematic

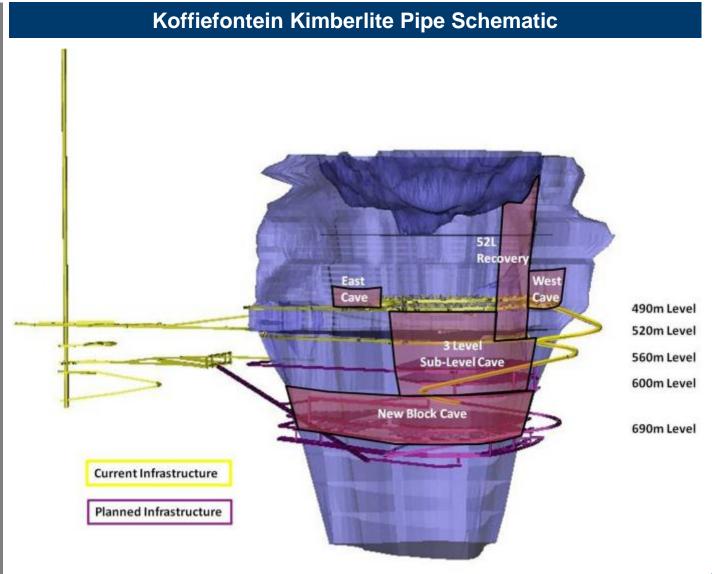

Koffiefontein – Development Programme

Expansion Plan – to take production to c. 105,000 ctpa by FY 2017

- ROM production supplemented by ore from Ebenhaezer open pit (~5ha)
 FY 2014 to FY 2016
- Installation of SLC from 560m to 580m – FY 2014 to FY 2015
- SLC tunnel infrastructure underway and ore-handling conveyor installation in final commissioning – FY 2014
- Ramp up ROM production to 1.0 Mt by FY 2016 and 1.1 Mt by FY 2017

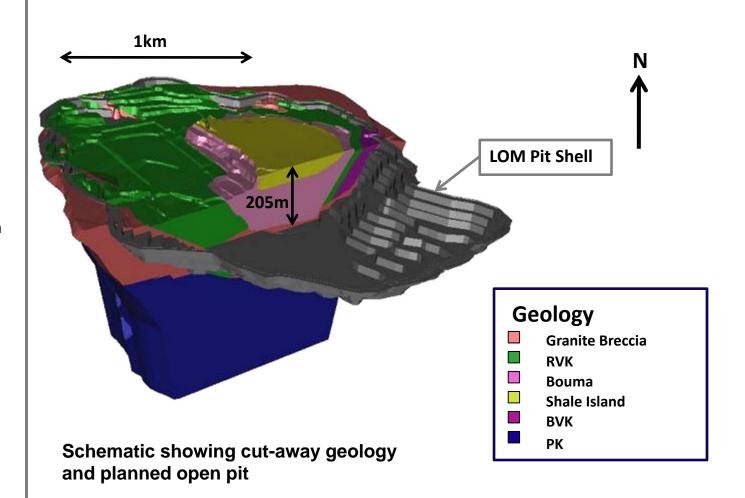

Williamson – Development Programme

Expansion Plan – to take production to c. 300,000 ctpa by FY 2017

- Production resumed further to the enhanced rebuild of plant – Q4 FY 2012
- Successful ramp-up of production to 2.7 Mt – FY 2013
- Re-crush circuit in plant, plus other plant design efficiencies, allowing for increased throughput – from FY 2014
- ROM stockpile (~550,000t containing +30,000 carats), established due to the pitshaping operations to be treated – up to FY 2016
- Ramp up of ROM production to c. 5 Mtpa (300,000 cts) by FY 2017
- Phase 2 longer term expansion plan to raise production above 5 Mtpa – under review

Williamson Kimberlite Pipe Schematic

Debt Facilities

- Nov 2012: new debt facilities put in place of ca. US\$213 million¹ with Absa, RMB (FNB) and IFC
- An increase and optimisation of Petra's prior debt structures (previously ca. US\$138 million)

Lender	Туре	Size	Interest Rate	Repayment
Absa & RMB (FNB)	Amortising term facility	US\$76.0	JIBAR + 4.0%	5 semi-annual payments from Mar 16
IFC	Amortising term facility	US\$35.0	LIBOR + 4.0%	5 semi-annual payments from Mar 16
Absa & RMB (FNB)	Revolving credit facility	US\$29.0	JIBAR + 5.5%	Repayable Sep 18
IFC	Revolving credit facility	US\$25.0	LIBOR + 5.5%	Repayable Sep 18
Absa & RMB (FNB)	Working capital facility and foreign exchange settlement lines	US\$48.0	SA Prime – 0.5%	Subject to annual renewal

IFC's involvement highlights the positive socio-economic impact Petra can have on its local communities

^{1.} Utilising an exchange rate of US\$1:R10.445

- 1. All Capex numbers are stated in FY 2014 money terms (except for FY 2013 actuals)
- 2. Depreciation on mining assets for FY 2014 guided at c. US\$45 million
- 3. As in prior guidance, capital estimates above do not include any capitalised borrowing costs; guidance is to assume 95% of borrowing costs are to be capitalised

South Africa and Tanzania

	South Africa	Tanzania
Corporate tax	28%	30%
Diamond royalty	Formula based on profitability of mining operation; 0.5% up to 7% of turnover	5% of turnover
